

Mobile Elevating Work Platform Operator Certification Transfer Nova Scotia OH&S Compliant

Mobile Elevating Work Platform Operator Certification Transfer Nova Scotia OH&S Compliant

First Edition

November, 2021

No part of this manual may be reproduced in any form or by any means, for any purpose without the express written permission of Saga Universal Training Corporation

Saga Universal Training Corp. is dedicated to reducing deaths caused by illness and injury. The goal of this program is to ensure operators have the **basic knowledge and skills** required for the safe operation of their equipment and its attachments. However, due to the different types of powered mobile equipment, certain statements in this program may not apply.

Job and/or familiarization of operators for particular machines or specialized equipment used in specific workplace environments are in addition to this training. It is expected that an employer will take the fundamentals of this training and apply them to their specific machine and workplace.

Readers should not assume that reviewing this manual alone constitutes complete powered mobile equipment operator training.

DISCLAIMER

The information contained in this manual is intended to supplement the specific information that is contained in the equipment manufacturers' operating manual(s).

It is expected that an employer will take the fundamentals of this training and apply them to their specific machine and workplace.

Job and/or familiarization of operators for particular machines or specialized equipment used in specific workplace environments are in addition to this training.

Although every effort is made to ensure the accuracy, currency and completeness of the information, Saga does not guarantee, warrant, represent or undertake that the information provided is correct, accurate or current. Saga is not liable for any loss, claim, or demand arising directly or indirectly from any use or reliance upon the information.

In this course the participant is responsible for researching and determining the specific legislation and regulations that apply to them.

COURSE DESCRIPTION

Program Overview

- This is a “Certification Transfer” course; which means basic operational training, skills, and knowledge must have been acquired through a full Saga mobile elevating work platform course prior to enrolment.
- The focus of a “Certification Transfer” course is the legislative and regulatory requirements of the jurisdiction for which the certificate will be issued.
- The combination of successful completion of a Saga mobile elevating work platform Operator Certification course and Certification Transfer course provides the basic training, skills, and knowledge necessary to operate the equipment within the jurisdiction where certification is being transferred to.
- In this course “powered mobile equipment” is interchangeable with “mobile equipment” as used in other jurisdictions.
- This course follows the New Brunswick OH&S Act and Regulations.
- This program takes into consideration the guidelines and principals of the Canadian Centre for Occupational Health and Safety (CCOHS).
- This program takes into consideration the Canadian Standards Association B354.8:17 Mobile elevating work platforms.
- This program provides the minimum requirements for the training of operators for mobile elevating work platform and is intended to supplement a company’s larger Health & Safety Management System.

Course Goals:

- The student should have an awareness of the various legislation, regulations and standards that pertain to mobile elevating work platforms in New Brunswick.
- The student should understand the roles and responsibilities of employers and employees as they relate to the operation of mobile elevating work platforms in New Brunswick.

Prerequisites

- Students must have a current Saga powered mobile elevating work platform operator certificate.
- The student should have an awareness of the various standards that pertain to mobile elevating work platforms.
- The student should understand the importance of mobile elevating work platform inspections and how to conduct the inspections safely.
- The student should be familiar with safe operating procedures for mobile elevating work platforms.
- The student should be familiar with different types of mobile elevating work platforms, their basic structural components, basic function, and potential hazards while operating mobile elevating work platforms and how to control those hazards.
- The student should have a basic understanding of the proper use of mobile elevating work platform attachments and potential hazards associated with mobile elevating work platform attachments.
- The student should have a basic understanding of the operation of the most common mobile elevating work platforms.

Certification:

- At the end of the course there will be a multiple choice, open-book exam, of which at least 80% correct must be achieved.
- Certificates of training issued by Saga Universal Training Corp. must be recognized by the employer.
- Certification Transfer certificates will be for the same equipment as the “Operator Certification” certificate presented to enrol in this certification transfer course.
- Certification Transfer certificates expire on the same date as the operator certification presented to enrol in this certification transfer course.

NOVA SCOTIA LEGISLATION AND REGULATIONS

“powered mobile equipment” means self-propelled equipment that is designed to operate on land in conditions other than a public highway, but does not include equipment primarily designed to transport persons, a lift truck or a power operated elevating work platform.

“power operated elevating work platform” means a mobile horizontal working surface that provides access and support to a person at a workplace, and that is elevated and lowered by means of a mechanism and [that complies with] Part 23: Scaffolds and Other Elevated Work Platforms, of the *Workplace Health and Safety Regulations* made under the Act;
